

KLARA MODULES

Nordic modular living – simplified

Beautiful Nordic modular homes designed for modern living, guest accommodation and hospitality businesses.

Built in Finland. Delivered move-in ready.

A SMARTER WAY TO BUILD

Klara Modules combines Nordic architecture, efficient modular construction and carefully optimized layouts into a simpler way of living.

Instead of long and stressful building projects, a Klara module arrives fully completed and ready for installation.

Every model is designed around the same philosophy:

- Timeless Nordic design
- Smart and efficient layouts
- Natural materials
- Energy-efficient Nordic construction
- Minimal maintenance
- Fast delivery
- Premium atmosphere with a smaller footprint
- Move it to a new location, repurpose it, or sell it on to someone else

Klara modules are not custom-built projects.

They are refined products – optimized for quality, comfort, speed and simplicity.

Like a premium car, every detail has been carefully considered and perfected.

BUILT FOR NORDIC LIVING

All Klara models are built in Finland using Nordic construction principles developed for demanding climates and year-round living.

Standard features include:

- 1 bedroom
- Bathroom with toilet, shower and sauna
- Fully equipped kitchen
- Underfloor heating
- Highly insulated structure
- Large energy-efficient windows
- Ventilation system
- Fixed cabinetry and interior solutions
- Fully completed interior and exterior

Only furniture is required before move-in.

Construction highlights

- Timber-based structure
- Natural materials
- Energy-efficient design
- Well-insulated walls, roof and floor
- Built according to Finnish building practices
- Factory-built precision and quality control
- Designed for optimal transportation

Heating

Electric underfloor heating is included as standard.

Optional off-grid solutions and fireplace alternatives may be available depending on market and configuration.

INTERIOR

FOR GUEST ACCOMMODATION

Create space without creating stress

A Klara module is the perfect guest house solution for families who want additional space without starting a large traditional construction project.

Whether placed beside a lake house, countryside home or vacation property, the module creates a fully independent and comfortable living experience for guests.

Instead of temporary sleeping arrangements or expensive extensions, your family and visitors enjoy privacy, comfort and Nordic design in a complete standalone space.

Why it works perfectly as a guest house

- Delivered move-in ready
- Minimal disruption to existing property
- Full bathroom with sauna
- Comfortable year-round use
- Premium guest experience
- Fast installation process
- Low-maintenance ownership

AIRBNB & RENTAL INCOME

Travelers today are looking for more than accommodation.

They are looking for experiences.

Klara modules are designed to create warm, memorable Nordic stays with strong visual identity and premium atmosphere.

The combination of Nordic **architecture**, natural materials and compact luxury creates highly attractive rental properties for platforms like Airbnb.

Why Klara works for short-term rentals

- Fast path to rental operation
- Premium nightly pricing potential
- Low operating costs
- Strong social media appeal
- Year-round usability
- Compact but luxurious feeling
- Energy-efficient operation

Typical ROI

Depending on location, occupancy and pricing, many hospitality investments aim for a return period of approximately 5–10 years.

FOR DOWNSIZING OR FRIST HOME

Smaller home. Better living.

Many homeowners are choosing to simplify life and reduce unnecessary space, maintenance and costs.

Klara modules are designed around the Nordic philosophy that smaller homes can still feel calm, luxurious and deeply comfortable.

The result is a home focused on what truly matters: quality, warmth, simplicity and freedom.

Why downsizers choose Klara

- Lower maintenance
- Efficient use of space
- Lower energy consumption
- Faster move-in process
- Cozy and warm atmosphere
- Simplified lifestyle
- High-quality Nordic design
- When life changes, move it to a new location, repurpose it, or sell it on to someone else

Less house. More life.

FOR CAMPINGS, RESORTS & HOSPITALITY

Upgrade your accommodation business

Modern travelers expect more than traditional cabins and caravans.

Klara modules allow campgrounds, resorts and hospitality businesses to offer premium Nordic accommodation experiences with minimal operational disruption.

Ideal for:

- Campgrounds
- Nature resorts
- Glamping businesses
- Boutique hospitality concepts
- Ski and lake destinations

Business advantages

- Fast deployment
- Expand accommodation capacity quickly
- Premium pricing opportunities
- Strong visual identity
- High guest satisfaction potential
- Factory-built quality consistency
- Scalable business model

Operational advantages

- Minimal on-site construction
- Delivered nearly completed
- Energy-efficient buildings
- Year-round usability
- Easy future expansion

Every Klara module includes:

- Finished exterior
- Finished interior surfaces
- Kitchen and fixed cabinetry
- Bathroom with fully equipped sauna, toilet and shower
- Electrical installations
- Fixed lighting
- Underfloor heating
- Manual ventilation system
- Windows and exterior doors

Not included

- Furniture
- Ground preparation
- Crane installation
- Utility connections
- Local permits
- Transport costs

DELIVERY & INSTALLATION

From factory to installation

From factory to finished installation

1. Order confirmation

The customer selects model and available options.

2. Factory production

The module is built indoors in Finland.

3. Ground preparation

The customer prepares foundations and utility connections locally.

4. Delivery

The completed module is transported by standard trailer to destination.

No special transport is normally required.

5. Crane installation

A crane is used to position the module on-site.

6. Final connections

Electricity, water, sewage and internet connections are completed locally.

Typical lead time

Approximately 10–12 working weeks + transport.

FOUNDATIONS & UTILITIES

Site preparation

Groundwork and foundations are handled locally by the customer or contractor.

Depending on site conditions and local regulations, suitable foundations may include:

- Gravel base
- Pillars
- Concrete slab

Utility preparation

Electricity, water, sewage and internet should be prepared to the correct location before installation.

Off-grid possibilities

Certain off-grid solutions such as solar panel systems may be available depending on project scope and market.

FREQUENTLY ASKED QUESTIONS

Can I customize the layout?

Klara modules are optimized standardized models designed for the best balance of quality, delivery speed and cost efficiency.

Certain colors, materials and upgrade options may be available, but the core layouts remain fixed.

Are the modules suitable for winter use?

Yes. Klara modules are designed for Nordic climate conditions and year-round living.

Do I need a building permit?

Local building regulations always apply.

The customer is responsible for obtaining permits and ensuring local compliance.

Who is responsible for regulatory compliance?

Klara Modules is responsible for the module construction itself.

The customer is responsible for local permits, site preparation and compliance with local requirements.

How energy efficient are the modules?

The modules are designed according to Finnish building practices with highly insulated structures and energy-efficient solutions.

Actual energy consumption depends on climate, usage habits and local energy prices.

How are the modules heated?

Electric underfloor heating is included as standard.

Can the module be relocated in the future?

Yes. One of the advantages of modular construction is that the building can potentially be relocated or resold in the future.

How long does a modular home last?

Klara modules are built using Nordic timber construction methods designed for long-term use and demanding climates.

Like any building, lifespan depends on maintenance, environment and usage.

Is financing available?

Klara Modules currently does not provide financing services.

Can the modules be insured?

Insurance possibilities depend on local providers and regulations. Customers should contact local insurance companies for project-specific information.

NORDIC SIMPLICITY – BUILT TO LAST

Klara Modules combines Nordic craftsmanship, smart design and efficient modular construction into a simpler and more beautiful way of living.

Designed in Finland. Built for modern life.
